Number of people active in 2015/16:	8	19	8	8	16	24	63	146

6. Can you provide the equalities profile of your volunteers?
Yes, as follows overleaf. However:
 - o Discussions will take place as part of our pledge 2 action-planning on the improvement and consistent application of equalities monitoring processes.
 - o Some services/opportunities did not ask for information on religion/belief or sexual orientation, others did ask but people preferred not to answer those questions.
 - o In addition, the format of data collected for disability and age was inconsistent across the organisation.
 - o Although the data for ethnic origin and the Scottish Index of Multiple Deprivation shows that the make-up of our volunteering workforce is consistent with Glasgow's population profile (11.6% of all volunteers were not white; 41% live in the 15% most deprived SIMD datazones), there is a clear imbalance between the sexes with 71.9% of Volunteer Glasgow's volunteers in 2015/16 being female.
